

## Base Connector SWS

The **Base Connector SWS200** is the optimal connection between the robot and its base. It takes only seconds to change out the robot or place it into a different application. The intuitive and safe operation will make your robot more flexible.

The **Base Connector SWS200** is compatible with all light robots / cobots with a max payload of approximately 16 kg and a robot weight of approximately 50 kg. Please inform us of the robot manufacturer to ensure the correct drill hole pattern.

## Base Connector SWS200

The **Base Connector SWS200** is the ideal mechanical connection for light robots. The intuitive operation is easy and does not require any tools.

The SWS upper assembly, as depicted in the drawing, is mounted to the base of the robot. The lower assembly is mounted to the work surface.

# Base Connector SWS200

Technical specifications

### Operating mode:

By rotating the semi-cylindrical bolt by 180° the upper assembly (1) and the lower assembly (2) are braced in a form-closed manner

### Advantages:

- Without hand lever, thereby low interference contours
- High repeat accuracy +/- 0.02 mm
- Optional connection of a power coupling MEK for electrical and pneumatical ducts
- Holds up to 10,000 changing cycles
- During locking, the lower assembly is pulled around the locking stroke
- Interface according to DIN EN ISO 9409-1
- Low dead weight due to the combination of steel and aluminum
