

PRODUCT INFO

T-clamps TK of die-cast aluminum or precision-cast stainless steel have slitted clamping points machined by cutting methods.

The bores at the clamping points are situated in a plane and arranged in a T-shape. They receive typically available rods and tubes with full surface contact over the entire cross-section of the bore.

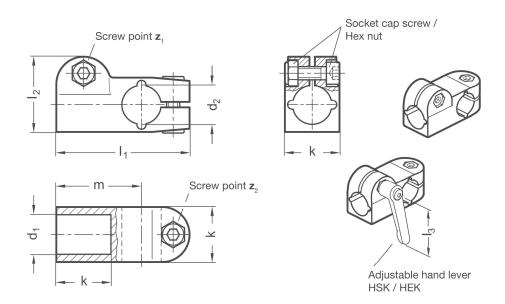

At the screw points, hex socket cap screws or adjustable hand levers reduce the bore cross-section for clamping.

Adjustable hand levers are intended for repeated, tool-free clamping. Under the designation HSK or HEK, these are available separately for individual use and in other designs. Compared with the tool-operated hex socket cap screw, the clamping force achievable with an adjustable hand lever is lower due to the shorter lever length.

RoHS-compliant product

Screw points

Z

- 1		
- 1	4	Hay apply the property of the plated DIN 010.00 and leak but at all DIN 005.00 Fine plated (aply for aluminum alamna)
- 1	- 1	Hex socket cap screw steel, zinc-plated DIN 912-8.8 and lock nut steel DIN 985-8, zinc-plated (only for aluminum clamps)

2 Hex socket cap screw stainless steel DIN 912-A2-70 and lock nut stainless steel DIN 985-A2, glide coating

Surface / material

0

2	Aluminum, textured powder-coated, Black RAL 9005	
8	Aluminum, blasted, matt	
ED	Stainless steel, blasted, matt	

ACCESSORIES

- Adjustable hand levers **HSK** see page 168
- Stainless steel adjustable hand levers **HEK** see page 170

ON REQUEST

- Clamping points $\mbox{with different diameters} \ \mbox{d}_{\mbox{\scriptsize 1}} \ \mbox{and} \ \mbox{d}_{\mbox{\scriptsize 2}} \\ \mbox{or special diameter}$
- Screw points
 with hex head screws or mixed screw /
 adjustable hand lever elements
- Surface
 ball-burnished, anodized or powder-coated in other RAL colors
