

### PRODUCT INFO

The guide tubes of the **double tube linear units VD2E** are made of chrome-plated steel or polished stainless steel precision tubes. The aluminum end pieces connect the tubes and form a solid linear guide together with the two guide elements. A continuous spindle with ball bearings on both sides is installed in the center. This is comprised of one spindle part with left-hand thread and one with right-hand thread. Together with the single guide elements, the affixed spindle nuts move linearly in opposing directions along the spindle thread.

Double tube linear units have high torsional stiffness and can handle high weights and torques. Depending on the design, the part to be moved is fastened to the guide element or the guide element itself is installed at the place of use such that the entire linear unit moves together.

Possible accessories are already taken into account in the selection of the linear units according to the options given in the tables. This ensures, for example, that the journal lengths  $z_1$  and  $z_2$  are appropriate for attachment of the accessories. The accessories are not included with the linear units.

### RoHS-compliant product

**ORDER KEY**

Name key | Supplemental key  
**VD2E - d<sub>1</sub> - w - l<sub>1</sub> - r - p - z<sub>1</sub> - z<sub>2</sub>**

**ACCESSORIES**

- Handwheels **VZH** → see page 356
- Position indicators **VZPM / VZPE** → see page 358 / 360
- Clamping plates **VZK** → see page 362
- Torque supports **VZDD** → see page 368
- Angle gears **YLD** → see page 378
- Transfer units **VA** → see page 370

**ON REQUEST**

- Additional following guide elements
- Guide element connector plates
- Multiple guide elements with scissors synchronization
- Bellows covers
