## PRODUCT INFO

Position indicators VZPE indicate the distance travelled by linear units. They are mounted to the spindle journal of a linear unit using an adapter bushing and a grub screw.
Position indicators are matched to the size of the linear unit in the table. The position indicators must be adjusted for the thread pitch and direction of the respective linear unit using the operating buttons. The energy supply is ensured by a long-life battery.

The polyamide housing is ultrasonically welded, making it especially sturdy, tight and compact. The position indicator is also temperatureresistant to $50^{\circ} \mathrm{C}$ and resistant to oils and solvents. The foam rubber seal provides mechanical decoupling and also acts as a seal. The hollow shaft is made of stainless steel. In the IP 67 version, it is sealed with an NBR seal.

If the position indicator is attached to a single tube linear unit, a torque support VZDR or VZDV is required to prevent the position indicator from turning along.

RoHS-compliant product

## FOR USE WITH

- Single tube linear units, round, with torque support VZDR
- Single tube linear units, square, with torque support VZDV
- Double tube linear units

## ORDER KEY

```
VZPE - di_u-o
```

Position indicator $\qquad$ $\square$

## ON REQUEST

Ambient conditions $\qquad$
Surface

- Position indicator with wireless data transmission
